

Trade Name: Ohta' s Isan (Can)

Ohta' s Isan is a gastrointestinal medicine that combines crude drugs, antacids and digestive enzyme. It has mild but excellent effects for the treatment of various unpleasant symptoms such as overdrinking, heartburn and heaviness on the stomach.

<Features>

- ◎The efficient combination of 7 kinds of stomachic crude drugs strengthens gastrointestinal function, and is effective in heaviness on the stomach, loss of appetite and so on.
- ◎To make good use of crude drugs, Ohta' s Isan is manufactured with processing as little as possible.
- ◎Rapid-acting, continuously-acting antacids control gastric acidity and have effect on heartburn and stomachache.
- ◎The aroma of the pure crude drugs will bring about pleasant and refreshed feeling.
